Summary

Motivated and detail-oriented Computer Science graduate seeking a Software Engineer role, with strong proficiency in Java, JavaScript, SQL, HTML5, and CSS3, and hands-on experience in frontend development (responsive design, DOM manipulation) and backend development using Node.js and Express.js, along with foundational knowledge of Spring Boot; skilled in MySQL for basic queries and data handling, and well-versed in core concepts including Object-Oriented Programming (OOP), Data Structures, Exception Handling, Multithreading, and File Handling; familiar with Three.js and Geospatial Data Processing, and experienced in using Git, GitHub, VS Code, and IntelliJ IDEA for version control and collaborative development, with a strong ability to learn quickly, solve problems efficiently, and contribute to scalable, high-quality software solutions.

Experience

Software Engineering Intern

06/2025 – 07/2025 | Agra, India

ADRDE – DRDO, Agra

- Contributed to development of geospatial data processing systems for defense-related applications
- Processed and analyzed structured datasets to improve data accuracy, consistency, and usability
- Assisted in designing and testing software modules within a real-world R&D environment
- Collaborated with cross-functional teams following Software Development Life Cycle (SDLC) practices
- Supported technical documentation and system workflows for better project maintainability
- Gained exposure to scalable system design, debugging, and performance optimization techniques

Projects

3D UAV Flight Path Visualizer

<https://github.com/Adityasingh076/3D-UAV-Flight-Path-Visualizer.git>

- Engineered an interactive 3D simulation system to visualize UAV and satellite trajectories
- Built a data pipeline to process CSV-based geospatial datasets (latitude, longitude, orientation)
- Applied coordinate transformation and computational geometry to map GPS data into 3D space
- Developed features like dynamic camera tracking, trajectory rendering, and motion simulation
- Optimized rendering performance for real-time visualization and smooth animations
- Structured code for efficient data flow and scalable visualization logic

Brew Tech Coffee House – E-Commerce Platform

<https://github.com/Adityasingh076/BREW-TECH.git>

- Developed a responsive e-commerce web application focusing on clean UI and seamless user experience
- Implemented client-side cart system using local Storage for persistent session management
- Built dynamic product components including modals and filtering system
- Designed and implemented real-time billing and invoice generation module
- Applied DOM manipulation and event-driven programming for interactive features
- Ensured cross-device compatibility and performance optimization

Smart Bottle Turbidity Visualizer

JavaScript, Data Visualization, Frontend Engineering | <https://github.com/Adityasingh076/Smart-Bottle-Turbidity-Visualizer.git>

- Designed and developed a data visualization system to monitor and interpret water turbidity levels
- Implemented dynamic data handling using JavaScript for real-time updates and processing
- Built interactive UI components to represent sensor-based data clearly
- Applied data mapping techniques to convert raw inputs into meaningful visual insights
- Optimized rendering logic for smooth performance and user interaction
- Followed modular code structure for scalability and maintainability

Real-Time Chat Application

HTML, CSS, JavaScript, Node.js, Socket.IO | <https://github.com/Adityasingh076/SocketChat-Pro.git>

- Developed a real-time chat application enabling instant one-to-one communication between users
- Built backend using Node.js to handle client-server connections and real-time message exchange

- Integrated Socket.IO for real-time, bidirectional communication ensuring low-latency message delivery
- Implemented event-driven architecture for efficient data flow and seamless user interaction
- Designed a responsive and user-friendly interface using HTML, CSS, and JavaScript
- Optimized application performance for smooth messaging experience and scalability

Skills

Languages

- Java
- JavaScript
- SQL
- HTML5
- CSS3

Database

MySQL (Basic Queries, Data Handling)
MongoDB

Libraries / Technologies

- Three.js
- Geospatial Data Processing

Backend

- Spring Boot (Learning)
- Node JS
- Express.JS

Core Concepts

- Object-Oriented Programming (OOP)
- Exception Handling
- Multithreading
- File Handling

Tools & Platforms

- Git (Version Control)
- GitHub
- VS Code
- IntelliJ IDEA

Education

Bachelor of Technology (B.Tech)

2022 – 2026 | Mathura, India

Eshan College of Engineering, Mathura
• CGPA: 8.4 / 10 (till 7th Semester)

Class XII

2021 – 2022 | Agra, India

Shivalik Cambridge School, Agra
• 68%

Class X

2019 – 2020 | Agra, India

Shivalik Cambridge School, Agra
• 60%

Certificates

Summer Intern | Aerial Delivery Research and Development Establishment (DRDO) — June 2025 – July 2025 |

Completed a certified internship at DRDO, gaining exposure to real-world defense research and development environments | Assisted in software-related tasks involving Java, JavaScript, and basic backend development concepts | Worked with data handling and analysis using MySQL, improving database query skills | Applied Object-Oriented Programming (OOP) principles and problem-solving techniques in practical scenarios | Gained experience with version control tools like Git and collaborative development workflows | Strengthened understanding of debugging, code optimization, and structured development practices
